

I am writing in support of KBHC/1-800-SUICIDE and encourage the FCC to not simply transfer the lines at a request of another government agency. Please recognize that HHS/SAMHSA have been working at trying to suffocate 1-800-SUICIDE because they created a competing hotline.

Why does the government want private confidential caller information? Please protect the callers identity and realize that HHS/SAMHSA have not paid KBHC money that Congress appropriated for no real reason. Instead they are going to the FCC to try and get a rule changed to hostilely take the lines over anyway.

Do not let that private phone companies like Patriot and McLeod work with HHS/SAMHSA to break the rules and work against this nonprofit and the public good!
